## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-40, drawn to the compound of Formula IA, IB, IIA, IIB, IIIA or IIIB where  $X = O$ ,  $R_8 + R_9$  or  $R_{10}$  and  $R_{11} = \text{piperidine}$ , a method of treating, classified in class 546, subclass 92.
- II. Claims 1-40, drawn to the compound of Formula IA, IB, IIA, IIB, IIIA or IIIB, a method of treating where  $X = NR_{13}$  where  $R_{13}$  is as claimed,  $R_8 + R_9$  or  $R_{10} + R_{11} = \text{N-methyl piperazine}$ , classified in class 544, subclass 361.
- III. Claims 1-40, drawn to the compound of Formula IA, IB, IIA, IIB, IIIA or IIIB, a method of treating where  $X = S$  and  $R_8 + R_9$  or  $R_{10} + R_{11}$  equal morpholine or thiomorpholine, classified in class 544, subclass 408.
- IV. Claims 1-40, drawn to the compound of Formula IA, IB, IIA, IIB, IIIA or IIIB, a method of treating where  $X = S$ ,  $R_8 + R_9$  or  $R_{10} + R_{11}$  is pyrrolidine, classified in class 546, subclass 80.
- V. Claims 1-40, drawn to the compound of Formula IA, IB, IIA, IIB, IIIA or IIIB, a method of treating where  $X$  is  $O$ ,  $R_8 + R_9$  or  $R_{10} + R_{11}$  is piperaine, classified in class 546, subclass 92.
- VI. Claims 1-40, drawn to drawn to the compound of Formula IA, IB, IIA, IIB, IIIA or IIIB, a method of treating where  $X$  is  $O$ ,  $R_8 + R_9$  or  $R_{10} + R_{11}$  is morpholine or thiomorpholine, classified in class 544, subclass 408.

The inventions are distinct, each from the other because of the following reasons:

In the instant case the different inventions have achieved a separate status in the art, have separate fields that aren't coextensive, and are capable of supporting separate patents. Further, a prior art reference that would anticipate the claims under 35 USC 102(b) would not render obvious the same claim(s) under 35 U. S. C. 103 (a) with respect to another member. Searching the entire genus would be a burden on the USPTO in terms of time and expense.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Claims 1-35, 38-40 are generic to a plurality of disclosed patentably distinct species comprising X, R1-R7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Peter Dolan on 11/18/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
